

THE MANHASSET-LAKEVILLE WATER DISTRICT

NOTICE OF PUBLIC MEETING

The Board of Commissioners will present to the public its plans to replace the elevated storage tank, located on a 3-acre site in Munsey Park, which was constructed in 1929 and is now at the end of its useful life. The elevated storage tank is essential, District-wide, for a reliable water supply during power outages, to provide system wide pressure control, and to provide firefighters with instantaneous water supply to protect people and property throughout the District. We urge all District residents to attend the informational meeting and comment session.

Rendering of Proposed Tank next to the Existing Tank
